

TEC SCRN PRODUCTS

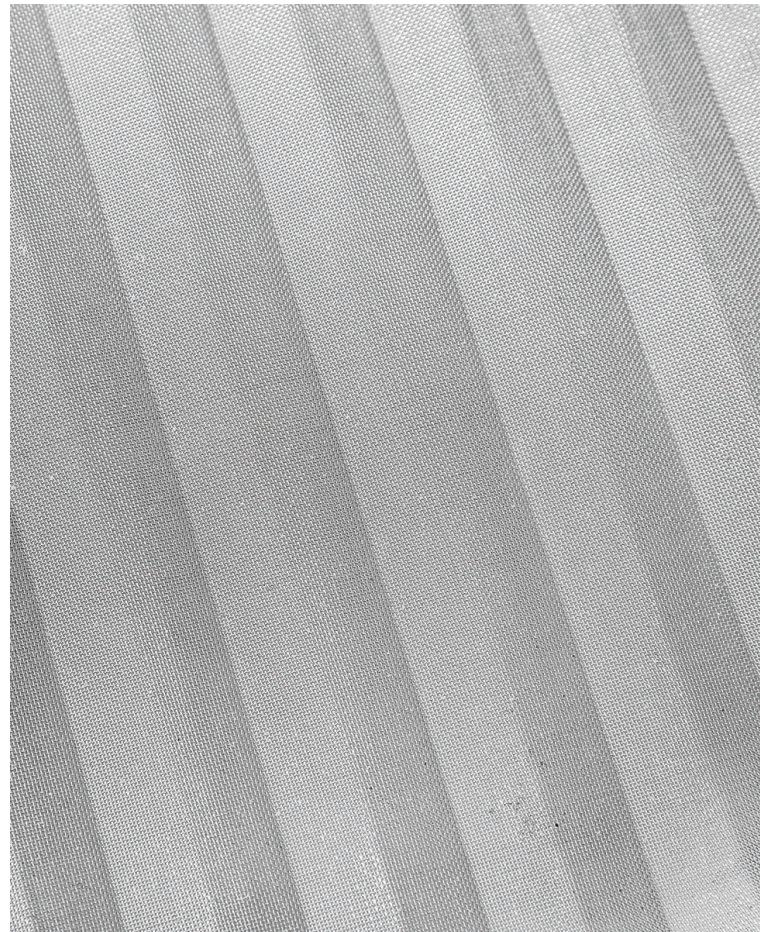

PLEATED SCREENS

Tec Scrn is your reliable, Canadian-owned source for all your separation and screening needs. We provide a variety of screening solutions engineered for performance and affordability and of course –we deliver exceptional service to back up every one of our products.

Our patented pleated screen design significantly increases screening efficiency and improves product cleanliness.

ABOUT TEC SCRN PLEATED SCREENS:

- Longer retention time on the screen surface
- The pleated surfaces cause material to roll, which ensures that the elongated particles are exposed to more mesh
- opening and therefore creates higher screening efficiency
- Pleated mesh imparts a natural bounce on the screening surface, which promotes self-cleaning
- Less drag out means a higher percentage of on-spec material

Tec Scrn is an industry-leading manufacturer of separation process equipment, designed and built to the highest standards of quality and precision. We have the ability to fabricate custom design products to meet unique applications or to your current specifications.
