

CIRCULAR SEPARATORS FOR THE CANNABIS INDUSTRY

Tec Scrn Circular Vibrating Separators are ideally suited for usage within the cannabis industry, from trichome harvesting to bud sorting to particle separation to improve extraction efficiency. Our separators are constructed in diameters ranging between 24" and 72", using the highest-grade stainless steel and finished to sanitary standards.

Our vibratory drive system can be quickly adjusted to provide an infinite range of separating patterns, and our innovative systems enable the operator to quickly and safely react to changes in product variations and specifications. Our vibrating separators are available with multiple decks, providing up to five particle size classifications, and can be customized to your precise requirements. Our vibratory drive system can accommodate virtually any separating pattern imaginable.

We deliver industry-leading separating solutions that are safe, sanitary and efficient. For more proprietary processes we offer custom manufacturing to suit your unique needs. Process equipment such as Q-Vacs, baskets, totes, tables, transition pieces and hand screens can be designed, built and finished to your precise specifications.

We also manufacture standard replacement screens for granulating equipment from manufacturers such as Fitzmill, Russel-Finex, SWECO, Kason, Frewitt, Gerteis and Alexander.
