

SEPARATORS FOR THE PHARMACEUTICALS INDUSTRY

Vibrating Separators for the Pharmaceuticals Industry

We deliver industry-leading pharmaceutical separating solutions that are safe, sanitary and efficient. For more proprietary processes we offer custom manufacturing to suit your unique needs. Separating equipment such as Q-Vacs, baskets, totes, tables, transition pieces and hand screens can be designed, built and finished to your precise specifications.

We also manufacture standard replacement screens for granulating equipment from manufacturers such as Fitzmill, Russel-Finex, SWECO, Kason, Frewitt, Gerteis and Alexander.

Centre Discharge Separators for Pharmaceuticals

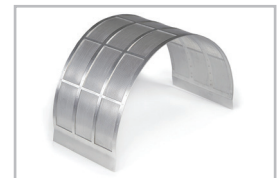

Our Tec Scrn Centre Discharge Separator and Tec Scrn Circular Vibrating Separator are ideally suited for usage within the pharmaceuticals industry. They're constructed from the highest-grade stainless steel – in diameters ranging between 24" and 72" – and are always finished to sanitary standards.

Our vibratory drive system can be adjusted to provide an infinite range of separating patterns, and our innovative systems enable the operator to quickly and safely react

to changes in product variations and specifications. Our engineers can even work with your product in our test facility to establish the most efficient configuration for your screening process.

Our vibrating separators for the pharmaceuticals industry are available with multiple decks, providing up to five particle size classifications, and can be customized to your precise requirements. Our vibratory drive system can accommodate virtually any separating pattern imaginable.
