

# SEPARATORS FOR PLASTICS MANUFACTURERS

## Vibrating Separators for Plastics Manufacturers

The North American plastics industry depends on Tec Scrn for highly versatile separating equipment able to accommodate its many applications and processing requirements. We rise to that challenge by manufacturing industry-leading circular separators and custom fabrication to meet your unique needs and specifications. Tec Scrn circular separators are designed to deliver unparalleled performance in sifting and separating all forms of liquid and solid materials in the plastics industry. Tec Scrn's cascade frames are widely used within the industry to remove debris, unwanted fines and longs from plastic pellet production, helping ensure a high-quality finished product.
